**Problem**

The V-belts needed to be replaced several times a year and required significant maintenance downtime. Slippage also caused the belts to be extremely inefficient.

---

**Solution Drive Description**

34 Air Handlers were converted using a variety of Poly Chain® GT® Carbon™ belt widths that best matched their application requirements.

---

**Benefits of Gates Drive**

By replacing the less efficient V-belt drives, the customer will realize over $6000 annually in energy savings and another $8500 in reduced maintenance for a total of $14,500.00 annual savings.
